

Upgrade SqView

by Thomas Bernhed

Version 9.19.2 - 2024

Download and installation

Download

The downloaded file is saved on your hard drive as a zip-file. Extract the files to a temporary folder.

- The folder "ListAndDef" contain Callerlab list and definitions in PDF format.
- The folder "ListAndDefHtml" contain Callerlab list and definitions in HTML format.
- bass.dll, bass_aac.dll, BASS_CDG.dll, bass_fx.dll, basscd.dll, bassenc.dll, bassflac.dll, bass.midi.dll and basswma.dll are used to play the music.
- sqlite3.dll is handling the database communication.
- SqView 9_19_2.pdf is the file that you are reading now.
- SqView helpfile.pdf is the same information as SqView.chm, but in a more printable format.
- Definitions.chm is Callerlab lists and definitions in helpfile format.
- SqView.chm is the new helpfile.
- SqView.exe is the actual program.
- tags.dll is used for displaying the music tag information.
- Utility.db is the database with the updated cuesheets.

Installation

Copy the files to your SqView folder and overwrite the old files. Your personal settings are saved in sqview.db so they are not changed.

Before starting the new version of SqView make a backup of the “SqView.db” to another folder

New features

All changes can be found in the helpfile.
